THE BUILDING

The Uptown is an approximately 235,000 sq ft mixed-use development in downtown Vancouver. An entire city block will be redeveloped to create a 6-story building with street-front retail, 167 apartment units, and below-grade parking. The vision is to cultivate a diversity of new uses that will complement the existing businesses and that will serve the resident population, as well as those working in and visiting the city center.
